
Installation Manual: 96cm Platinum Shoe Cabinet

This guide walks you through the 8-step assembly of your shoe cabinet. Please ensure you have all panels and hardware laid out before beginning.

Phase 1: Building the Frame

- **Step 1: Assemble the Backing**
Connect the **Back Panel** to the **Left Side Panel**. Ensure the alignment strips are correctly positioned to support the rear structure.
- **Step 2: Base and Support**
Attach the **Bottom Board** to the existing structure. At this stage, install the **Center Support Leg** underneath the base to ensure stability.
- **Step 3: Right Side Panel**
Secure the **Right Side Panel** to the base and back panel to complete the outer "U" shape of the cabinet frame.
- **Step 4: Internal Vertical Divider**
Install the **Center Vertical Board**. This divider creates the separate compartments for the shelves and drawers. Ensure the drawer runners/strips are facing inward as shown.

Phase 2: Shelving and Finishing

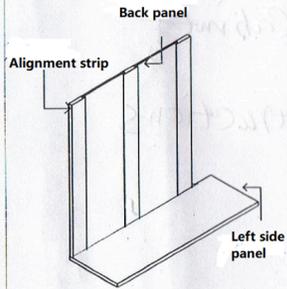

- **Step 5: Top Panel**
Place and secure the **Top Board** across the top of the side panels and the center divider.
 - **Step 6: Installing Shelves**
Slide the **Layer Boards/Shelves** into the designated slots. These are adjustable depending on the height of your footwear.
 - **Step 7: Drawers and Doors**
 - Assemble and slide the **Drawers** into the top sections.
 - Attach the **Cabinet Doors** using the provided hinges. Align them so they open and close smoothly.
 - **Step 8: Final Inspection**
The assembly is complete. Check all screws and fasteners to ensure the unit is sturdy and level.
-

Quick Reference Vocabulary

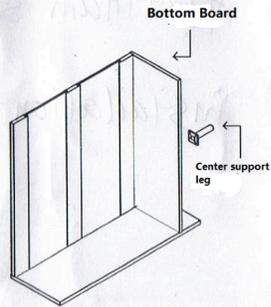

Board name and quantity
Back Panel-2 pieces
Left Side / Right Side Panel-1 Each side
Bottom Board / Top Board- 1 Each
Center Divider-1 piece
Shelves / Layer Boards-3 pieces each
Drawer-1 big and 1 small
Door Leaf- 3 pieces

Pro-Tip: If you find the doors are slightly uneven, you can usually adjust the depth and height by tightening or loosening the screws on the hinge plates.
